## Summary

Motivated Junior Software Tester with knowledge of software testing fundamentals, test cases, bug reporting, HTML, CSS, and Excel. Seeking an opportunity to apply my skills, gain practical experience, and contribute to software quality.

## Professional Experience

08/2026 – 12/2026

### Software Testing Trainee

Hybrid

Depi

- Learned Java programming fundamentals and practiced basic programming concepts.
- Improved English communication and professional communication skills.
- Developed soft skills including teamwork, communication, and problem-solving.

## Education

10/2025 – 06/2029

### Bachelor of Computer and Information Science – Cybersecurity

Assiut, Egypt

Faculty of Computers and Information, Assiut University

**Currently studying at the Faculty of Computers and Information, with plans to continue my studies in the second year.**

## Skills

### Software Testing

Manual Testing, Test Cases, Bug Reporting, Software Testing Fundamentals

### Microsoft Excel

Data Organization, Basic Excel

## Projects

09/2026 – 09/2026

### E-Commerce Website Testing

Software Tester – Part 2: Products & Search

Worked within a 4-member team to test an e-commerce website, responsible for Part 2: Products & Search. Tested product categories, search functionality, brand filtering, and product details. Designed and executed test cases, documented expected versus actual results, and reported defects with severity and priority classifications.

07/2026 – 08/2026

### Dental Clinic Management System

Automated Patient and Invoicing System for Dental Practices

Developed a comprehensive desktop database application using Microsoft Access to automate and streamline operations for a dental clinic.

Key Highlights:

- Relational Database Design: Built a normalized database structure featuring tables for Patients, Appointments, Services, and Invoices with enforced integrity and foreign key relationships.
- Interactive Forms: Designed user-friendly UI forms for seamless patient registration, appointment tracking, and billing management with quick navigation.
- Advanced SQL & Automation: Implemented complex parameter, action, and aggregate queries for multi-criteria searching (name, address, date, age) and conditional data updates.
- Dynamic Reporting: Integrated robust reports to track payment statuses, patient histories, and specific dental treatments.

Technologies Used: Microsoft Access, SQL, relational database modeling, UI forms design.
